ABSTRACT

This brochure provides information about projects funded in 1986 by grants under the Higher Education Act Title II-C Program, a program which assists major research libraries in maintaining and strengthening their collections, and in making their holdings available to individual researchers, scholars, and other libraries. The following information is provided for each of 38 funded projects: (1) institution; (2) project director; (3) program focus; (4) grant period; (5) FY 86 funding; (6) grant number; and (7) a summary of the project goals and activities. In addition, seven tables include an analysis of the FY 86 applications; state project and funding totals for FY 78 to FY 86; an analysis of FY 86 grants by major activity; totals and percentages of major activities for FY 78 to FY 86; a summary of program funding records; a summary of major activity for FY 78 to FY 86; and a summary of joint projects for FY 78 to FY 86. FOREWORD

The Title II-C Program was enacted through the Education Amendments of 1976 in recognition of the fact that the major research libraries of the Nation represent the bibliographic foundation of our research resources and that financial stringency and increased costs have severely reduced their capabilities for resource sharing. Grants under Title II-C assist major research libraries in maintaining and strengthening their collections, which are essential to scholarship and research on a national and world-wide basis, and assist them in making their holdings available to individual researchers and scholars and to other libraries whose users have need for such research materials.

This brochure has been prepared in order to respond to requests from librarians and other members of the public for information about the types of projects which have been funded by the Title II-C Program. As in previous years, this ninth year slate of awards reflects a diversity of subject matter and design in the effort to make accessible rare and unique collections of material. Tables which summarize these activities and the funding record to date are also included.

ABSTRACT

The American Antiquarian Society possesses the world's best collection of early American imprints and newspapers. From 1955 to about 1965 its staff edited the microform series Early American Imprints: First Series (Evans), published by Readex Microprint Corporation, which included the text of every available book, pamphlet, and broadside printed in the U.S. from 1640 to 1800. This microform series has proven to be of great value to scholarship, but full access to it has been hampered by a lack of adequate cataloguing. AAS will produce full MARC cataloguing of the microform set, which will be entered into national data bases and made available to individual libraries.

INSTITUTION	American Museum of Natural History Department of Library Services Central Park West & 79th Street New York, New York 10024
PROJECT DIRECTOR	Nina J. Root Chairwoman
PROGRAM FOCUS	Preservation
GRANT PERIOD	10-01-86 - 09-30-87
FY 86 FUNDING	$ 161,160
GRANT NUMBER	G008610216

ABSTRACT

The Library of the American Museum of Natural History will microfilm, restore and conserve some 80 unique scientific and historic ledgers, scrapbooks, field diaries and notebooks, and specimen catalogs from scientific expeditions, fieldwork, and laboratory work, which form a unique record of the development of science and a major scientific institution in the United States. These records are used daily for the curation of collections and in scientific research, therefore hard-copies will be provided, while the unique manuscripts, some dating from 1815, will be preserved, cataloged into OCLC, and made accessible to the scholarly community.

INSTITUTION	Art Institute of Chicago Ryerson & Burnham Libraries Michigan Avenue at Adams Street Chicago, Illinois 60603
PROJECT DIRECTOR	Carol S. Terry Serials Librarian
PROGRAM FOCUS	Bibliographic Control
GRANT PERIOD	10-01-86 - 12-31-87
FY 86 FUNDING	$ 79,327
GRANT NUMBER	G008610225

ABSTRACT

This project will add the complete art sales catalog holdings in the Ryerson & Burnham Libraries of The Art Institute of Chicago to the SCIPIO database, a special database of the Research Libraries Information Network. The Art Institute already has over 10,000 records in the database, and through this project, will complete their holdings with another 38,000 records. As a result of the project, the catalogs will be more accessible to outside researchers as well as to Art Institute staff and patrons.

ABSTRACT

The Center for Research Libraries (CRL) will continue to microfilm its collection of ethnic newspaper titles, published in 38 languages, and related to ethnic groups whose major migration to the United States took place in the late 19th and early 20th centuries. The files are extensive, and for a significant number of titles are either the only files or the largest and most complete file known. Bibliographic records were entered into the CONSER data base as a part of the Humanities Newspaper Project. Thus this collection is a scholarly resource to which there is adequate access, but which is in grave danger of rapidly disappearing.

GRANT NUMBER	G008610227

ABSTRACT

This project will catalog and preserve unique and rare titles from the Edwin R. A. Seligman Collection in the field of economics. The titles include monographs from the 18th century; pamphlets; broadsides (16th-19th centuries); pamphlets belonging to the Chartist Francis Place; and pamphlets dating from the 19th century. Titles will be input to RLIN and reported to the ESTC project. The subject matter covered includes banking, currency, trade, slavery, commerce, and labor.

ABSTRACT

To help meet the national need for comprehensive access to materials on agriculture in China, Cornell University will make its holdings records accessible. Machine-readable catalog records will be created for the existing collection and these will be entered into bibliographic databases available nationally and internationally. Some protective preservation treatment will be included. This project will lay the groundwork for an ongoing program of acquisition and cataloging of Chinese language material in technical agriculture.

ABSTRACT

This project will improve accessibility and availability of the Dartmouth College Library collections in theatre and the performing arts, a comprehensive resource consisting of monographs, periodicals, newspapers, scripts, libretti, programs, playbills, scrapbooks, slides, sheet music, and other materials providing primary source materials for research in the performing arts. The collections contain in total some 48,000 individual items falling into four major categories: (1) plays, (2) playbills, (3) non-book materials, and (4) sheet music.

Machine-readable records in the MARC format will be prepared according to current cataloging standards and the records made available in the RLIN and OCLC shared cataloging databases and in the Dartmouth Online Catalog. The shelf life of the materials in these collections will be extended throughout the application of various conservation and preservation operations.

INSTITUTION	Detroit Public Library 5201 Woodward Avenue Detroit, Michigan 48202
PROJECT DIRECTOR	Ronald Grantz Curator, National Automotive History Collection
PROGRAM FOCUS	Bibliographic Control & Preservation
GRANT PERIOD	01-01-87 - 12-31-87
FY 86 FUNDING	$ 60,799
GRANT NUMBER	G008610215

ABSTRACT

To insure preservation of the 123,000 photographic prints of the pioneer automotive photographer Nathan Lazarnick, the 91 albums in which the prints are compiled will be microfilmed to produce a master negative from which prints may be generated as needed or on demand, and a positive film which can be made available for general public use. The albums themselves will be preserved as historic artifacts by interleaving opposing pages with mylar sheets. Information from multiple sources will be correlated to provide the basis of an eventual comprehensive index to the photographic prints.

ABSTRACT

The current serial holdings of Duke University, North Carolina State University at Raleigh and University of North Carolina at Chapel Hill will be converted to machine readable form. Tapes of the serial records will be available through BIS and SOLINET, making a complete union list of the serial holdings of all the research libraries in the Southeastern United States.

ABSTRACT

The Emory University Libraries will conduct a project of retrospective conversion, cataloging, and preservation for a discrete collection of 16,977 titles of eighteenth century imprints in the subject areas of philosophy and religion. Cognizance of national and international efforts, professional awareness of the importance of preservation activities, and the uniqueness and strength of the libraries' eighteenth century imprints in philosophy and religion have determined the choice of library materials for this project. A major portion of titles covered by the project have not been contributed as yet to the bibliographic utilities, OCLC and RLIN. Implementation of the DOBIS/Leuven automated library system provides the opportunity to create an innovative data base of preservation decisions.

INSTITUTION	Folger Shakespeare Library 201 East Capitol Street, S.E. Washington, D.C. 20003
PROJECT DIRECTOR	Philip A. Knachel Associate Director
PROGRAM FOCUS	Collection Development
GRANT PERIOD	10-01-86 - 12-31-87
FY 86 FUNDING	$ 124,968
GRANT NUMBER	G008610221

ABSTRACT

Title II-C support will be used to acquire materials which will complement and make more accessible the Folger's extensive holdings of Renaissance and early modern books and manuscripts. Specifically, funds will be allocated to the acquisition of 1) Large Continental reference sets. These sets, recommended by scholar consultants, comprise collections of printed source materials pertinent to the study of European history in the Renaissance/early modern period, and 2) Microfilms of English Renaissance Manuscripts Collections. Microfilm has recently been published covering large collections of thousands of manuscripts dating from the English Renaissance. Researchers in this country will benefit enormously from the access of these important materials.

PROJECT DIRECTOR	Sidney Verba Director of the Library
PROGRAM FOCUS	Bibliographic Control & Preservation
GRANT PERIOD	10-01-86 - 12-31-87
FY 86 FUNDING	$ 239,943
GRANT NUMBER	G008610201

ABSTRACT

The Harvard University Library will improve bibliographical control of its collection of master negative microfilms (many of which were produced in the course of previous Title II-C projects) preparatory to publication of special lists and to input into national data bases; it will also film some one million pages of valuable research materials that are too rare or fragile for lending. A master negative and a positive copy will be made of each item filmed; other research libraries will be informed that copies are available for borrowing, and that positive film copies may be purchased at cost. Specific collections will be filmed in eight subject areas--Botany, Business, Chinese, Church History, Law, Mathematics, Women's Studies, and Zoology.

INSTITUTION	Houston Academy of Medicine Texas Medical Center Library Historical Research Center 1133 M.D. Anderson Boulevard Houston, Texas 77030
PROJECT DIRECTOR	Elizabeth Borst White Director, Historical Research Center

GRANT NUMBER	G008610205

ABSTRACT

The Houston Academy of Medicine-Texas Medical Center Library serves over 18 non-profit institutions which have a combined, annual research budget of over $210,000,000. Nearly 17,000 clients from these institutions depend on the Library for many services. One service point, the Historical Research Center, houses a particularly comprehensive special collection, the Burbank - Fraser Collection on Arthritis, Rheumatism, and Gout. Access is limited by inadequate or non-existent cataloging. Thus the collection is not available for historical and scientific research. This project will catalog this collection, enter the data into the OCLC network, provide the cataloging worksheets the University of Pittsburgh's Falk Library, and publicize the collection to historians, researchers, and libraries.

INSTITUTION	Henry E. Huntington Library 1151 Oxford Road San Marino, California 91108

PROGRAM FOCUS	Preservation
GRANT PERIOD	10-01-86 - 12-31-87
FY 86 FUNDING	$ 53,380
GRANT NUMBER	G008610228

ABSTRACT

The purpose of this project is to preserve and make available to scholars the Samuel L.M. Barlow letterbooks and Richard Bull's expanded version of James Granger's Biographical History of England. The use of the letterbooks has been severely restricted because of their fragility and the Bull Collection is deteriorating because of heavy use. The letterbooks will be preserved on microfilm and reproductions made available to scholars; the originals will be retired from hands-on use. For the Bull Collection the covers of the 36 volumes will be removed, cleaned, edges trimmed, pages cleaned, and repairs will be made on approximately 100 prints and mounts, which will then be stored in acid-free, clam-shell boxes.

ABSTRACT

The Indiana University Libraries will increase nationwide bibliographic access and availability of Indiana University's extensive collection of operatic musical scores and recordings by cataloging significant additional materials. This project will make available and conserve preeminent collections of international opera materials housed in the School of Music Library and the Lilly Library that are primary resources for performers, scholars, and researchers around the world. The project will significantly increase and enhance the quality of machine-readable bibliographic records and name/name-title authority work.

ABSTRACT

The Yale University Library Collection of German Baroque Literature on microfilm, consisting of 2363 titles, is an essential resource for the study of seventeeth-century German literature. It is currently accessible only through printed guides and cards filed in the local catalogs of Yale University and of the thirteen research libraries which own the set. The focus of this project will be to catalog each title in the Collection according to current cataloging standards and to enter the bibliographic records into the RLIN database of the Research Libraries Group.

ABSTRACT

This project will provide national access to the MIT Libraries' collection of scientific and technological publications issued by the Institute from 1861 through 1974 by cataloging and adding full MARC records to OCLC. The collection consists of both published information, primarily in the form of technical publications, and archival and manuscript collections that chronicle the contributions made by the Massachusetts Institute of Technology from its founding in 1861 through the middle of the 1970's.

GRANT PERIOD	10-01-86 - 12-31-87
FY 86 FUNDING	$ 240,044
GRANT NUMBER	G008610198

ABSTRACT

This project will increase the accessibility for the nation's research and academic library community to the extensive collections of plant science literature held in the libraries of the Missouri Botanical Garden and The New York Botanical Garden, the nation's two most comprehensive botanical libraries. This will be accomplished by continuing the program of shared recataloging and OCLC entry begun by the two libraries in October 1978, whereby cataloging and holdings records for both libraries are entered into the OCLC data base.

INSTITUTION	New York Public Library Slavonic Division 5th Avenue and 42nd Street New York, New York 10018

ABSTRACT

The project will conserve, enrich, and catalog the Slavonic Division's holdings of Russian pre-revolutionary social, political and literary journals published in the Russian empire from the late eighteenth century to the revolution in 1917 by reconverting its extant collections of Soviet-produced microfilm to safety film any nitrate-based film, by microfilming Russian periodicals not available in republished form, by filling all lacunae with microforms obtained from the Helsinki University Library, or from its exchange partners in the Soviet Union, and by converting its rare indexes to Russian, pre-revolutionary newsletters and enhancing these indexes with additional index titles from Helsinki and Soviet repositories.

PROJECT DIRECTOR	Jill Fatzer Assistant Director of Libraries
PROGRAM FOCUS	Bibliographic Control & Preservation
GRANT PERIOD	10-01-86 - 09-30-87
FY 86 FUNDING	$ 88,355
GRANT NUMBER	G008610207

ABSTRACT

This project will preserve and provide online bibliographic access to the unique collection of medieval and medieval tradition (13th through 20th century) Slavic Cyrillic manuscripts in microform in the Hilander Research Library of OSU. OSU will catalog the collection on the OCLC system, employing the standard MARC format, observing all conventions of AACR2. Bibliograhic records thus created will be copied to a discrete archive tape. This tape and the computer-output microform produced from it will allow these data to be provided to RLIN and other bibliographic networks, to individual scholars, and to research centers in the United States and abroad. It will also be the basis of derivative bibliographic publications.

INSTITUTION	Princeton University Library P.O. Box 36 Princeton, New Jersey 08544
PROJECT DIRECTOR	Dorothy A. Pearson Associate University Librarian for Administrative Services

GRANT PERIOD	10-01-86 - 12-31-87
FY 86 FUNDING	$ 50,427
GRANT NUMBER	G008610206

ABSTRACT

This project will produce master preservation microfilm to catalogue and create machine-readable records for collections of individual pamphlets, monographs and serials, as well as posters, broadsides and flyers which collectively document the socio-economic and political life of Latin America. The project will thus preserve and provide access to primary source material known not to be collected systematically and preserved elsewhere, even in the countries of issuance. These catalogue records, indexed at both the collection and individual pamphlet level, will be placed in the Research Libraries Information Network (RLIN) database, and will contribute all newly established headings, together with a complete authority structure, to the library community through the Name Authority Cooperative Project (NACO).

ABSTRACT

In order to provide increased access for its own users, machine-readable catalog records for research libraries throughout the nation, and authority records for the Name Authority File, Stanford University will create and input into the RLIN database bibliographic records with multiple access points and NACO headings for the individual titles of the microfilm set Goldsmith's-Kress Library of Economic Literature, segment I and supplement, published by Research Publications.

GRANT NUMBER	G008610232

ABSTRACT

The Hoover Institution posesses a Poster Collection totaling approximately 68,000 items: illustrated wall placards, official proclamations, and propaganda of various other types. It constitutes the largest known collection of international political posters in the United States. The newspaper collection also serves as a frequent primary source for scholarly investigation. The papers are of particular significance since, in many instances, they represent the only available record dealing with specific events during times of political unrest or development.

In order to preserve these holdings, the Hoover Institution has begun a brittle document preservation program that includes two basic components for dealing with the two separate groups of materials. Color slides (use copies plus preservation copies) are made of the posters, using Kodachrome film. Selected posters receive applied treatment, and all posters are encapsulated, catalogued and indexed online. The newspapers are being microfilmed, with subsequent catalogue entries in RLIN.

ABSTRACT

The Library of the State Historical Society of Wisconsin is processing its "Cutter Pamphlet" collection into its current pamphlet collection that began to be fully cataloged and carefully conserved with material collected since 1967. The Cutter Pamphlets are a general collection of unbound ephemera, emphasizing social and cultural history, collected from 1854 to 1966. Less than half of the 40,000 titles have records on OCLC or any other national machine readable data base. Much of the collection is not fully cataloged, and much shows signs of wear and deterioration.

The project is making the collection more accessible to researchers across the nation by preserving materials needing basic conservation measures, and by entering full MARC records into OCLC for all items not now in the database. During this project period, half the collection will be conserved and approximately 9,600 new records will be added to the OCLC database.

ABSTRACT

The Poetry Collection, a unique collection of manuscripts and letters of twentieth century poetry in English, will be made accessible to individual researchers and scholars outside its normal clientele, and other libraries and research centers whose users have need for these resources.

The Collection will be accessible in MARC format through an international data base, RLIN.

ABSTRACT

The project will make research materials in The Bancroft Library more available to scholars by converting 50,000 card catalog records for printed materials into machine-readable form. Records created during the project will be entered into the national data bases of OCLC and RLIN, the Melvyl online union catalog of the University of California, and Berkeley's GLADIS online catalog. The Bancroft Library is comprised of two collections of internationally recognized distinction: The Bancroft Collection of Western America, including materials on Mexico and Central America; and the Rare Books Collection, encompassing extensive manuscript holdings and important printed collections in the areas of early printing, modern poetry, western authors, small press imprints, history of science, and numerous other fields. Internal studies indicate that at least 60% of the records converted (30,000) will be new to the national databases.

FY 86 FUNDING	$ 135,000
GRANT NUMBER	G008610213

ABSTRACT

This project will improve access to the Eaton Collection of Science Fiction and Fantasy Literature through increased bibliographic access and control through the cataloging of 20,000 titles. Bibliographic records will be produced in accordance with the Anglo-American Cataloguing Rules (2nd ed.) and the cataloging practices and policies of the Library of Congress subject headings. The resulting bibliographic records may be further disseminated as a supplement to or new edition of the 1983 three volume Eaton Catalog published by G.K. Hall.

ABSTRACT

The project will strengthen the Archive for New Poetry and extend access to these materials to the international scholarly community through cataloging, preservation, and dissemination of information. The UCSD Library will strengthen the Archive through a collection building effort that will ensure comprehensive coverage for fifty poets; materials will include both published works and manuscript/archival collections. It will also encompass microfilming, audio recording, and photocopying and will make some endangered materials available for scholarly research for the first time. The project will create or enhance more than 7,000 bibliographic records in the OCLC database; 2,000 new names will be added to the national authority file through the NACO Project. An important feature of the project will be the preparation of a collection-level brochure describing the Archive and a union index to all forty manuscript collections.

ABSTRACT

The University of Chicago Library will continue an important cooperative venture with the Library of Congress. The project will provide retrospective conversion and original cataloging in machine-readable form for titles in science and technology drawn from the John Crerar Library of the University of Chicago. The project creates both bibliographic and authority records adhering to the rigorous cataloging standards of the Library of Congress and contributes these records to the LC/MARC database through direct online entry. The records are distributed nationally through the LC/MARC distribution service. This project will create 5,500 full, LC-quality MARC bibliographic records, plus approximately 4,950 associated name authority records and 550 series authority records.

ABSTRACT

This project will conduct a retrospective cataloging and indexing program to strengthen the research collections of the University of Illinois Agriculture Library and to improve national and international access to hard copy sets of United States Department of Agriculture and state experiment station agricultural materials dating from 1862 to date through series analytics on the OCLC database and indexing on the AGRICOLA and AGRIS databases. This program comprises a retrospective portion of a nationwide program implemented by the national agricultural library in 1985 that will continue this work for 1986 onward.

ABSTRACT

The University of Kansas Libraries will continue the cataloging of serials and ephemeral materials contained in the Wilcox Collection of Contemporary Political Movements, an outstanding special collection of American extremist political literature. Acquired in 1965, the Collection has grown dramatically over the years and includes books, pamphlets, serials, tapes, manuscripts, and political ephemera relating to approximately 7,000 left-wing and right-wing organizations from the 1950s to the present. At the completion of the three-year project, approximately 4,000 serial titles and 50,000 pieces of ephemera will be cataloged and made nationally accessible through the OCLC data base. Thus, this project will provide access to unique primary resources which will support research in the areas of history, political science, sociology, psychology, American studies, and journalism.

ABSTRACT

The University of Kentucky will continue efforts to preserve and make bibliographically available its extensive Kentuckiana Collection of maps, broadsides, manuscripts, correspondence, and other archival resources. The University will conduct three projects. The first two were initiated with the support of HEA II-C funds in fiscal year 1985. First, the University will work in cooperation with the Kentucky Department of Libraries and Archives to clean, mend, deacidify, and encapsulate portions of its 18th and 19th Century collections. Second, the grant will allow the University to describe an additional 500 Kentuckiana-related manuscript collections at the record group level and to subsequently enter them into the OCLC data base using the Archives and Manuscripts Control Format. Finally, funding will allow the University to create a hard copy guide to its Kentuckiana Collection which will be disseminated across the United States.

ABSTRACT

The University of Maryland College Park Libraries, in cooperation with the University of Delaware Library, Texas A&M University Library, and the New York State Library, will provide machine-readable cataloging records over a two-year period for Segment 2 of the microfilm collection Goldsmiths'-Kress Library of Economic Literature, which consists of 29,412 titles on 1,669 reels. The cataloging for the titles in this collection will be produced in full MARC format in accordance with AACR2 description, LC Subject Headings, and OCLC Level I Bibliographic Input Standards in accordance with the cataloging policies and practices of the Library of Congress. The bibliographic records will be input into the OCLC database for immediate access by the more than 4,000 libraries participating in OCLC, and eventually by non-OCLC libraries. As a NACO participant, UMCP will also contribute authority records for all names not currently in the name authority file distributed by the Library of Congress. The subject and descriptive cataloging will be divided among the four participating libraries.

ABSTRACT

This project will improve scholarly access to the University of Minnesota's extensive Scandinavian holdings. Scandinavian documents of the Government Publications Library will be cataloged. For Sweden, Finland, Norway and Denmark, this collection consists of serial titles dating from the early nineteenth century onward, and monographic titles. In addition, selective serials will be analyzed, producing additional monographic records. This collection includes all major statistical series from these countries, and is particularly strong in social and economic information for Sweden and Norway. The catalog data will be entered into the nationally available Research Libraries Information Network (RLIN) data base and tape records will be contributed to the Online Computer Library Center, Inc. (OCLC) data base.

ABSTRACT

The purpose of this project is to provide or improve bibliographic access to approximately 10,710 pre-1800 imprints held by the University of Missouri-Columbia Libraries. The Libraries' aim is to provide full cataloging for these scarce, valuable, or unique titles, and to enter the records into the OCLC database. To those titles already in OCLC, the UMC Libraries' holdings symbol will be added. Many of these titles will also be reported to the Eighteenth Century Short Title Catalogue (ESTC), the North America Imprints Project (NAIP) and to the next Stillwell/Goff incunabula census. Finally, pre-1800 titles needing preservation will be treated or microfilmed.

ABSTRACT

This project will provide nationwide access to the unique John A. Nietz Textbook Collection, one of the three largest pre-1900 American Textbook collections in the United States. This funding will enable the University to complete the cataloging of 15,000 textbooks and to note the physical condition of each prior to preservation. Virtually all the records created or used in the project will be available at current national standards in the OCLC online union catalog. At the conclusion, an off-line index to the records in the Nietz Collection will be produced at the University of Pittsburgh, and published or otherwise disseminated to interested scholars and researchers.
